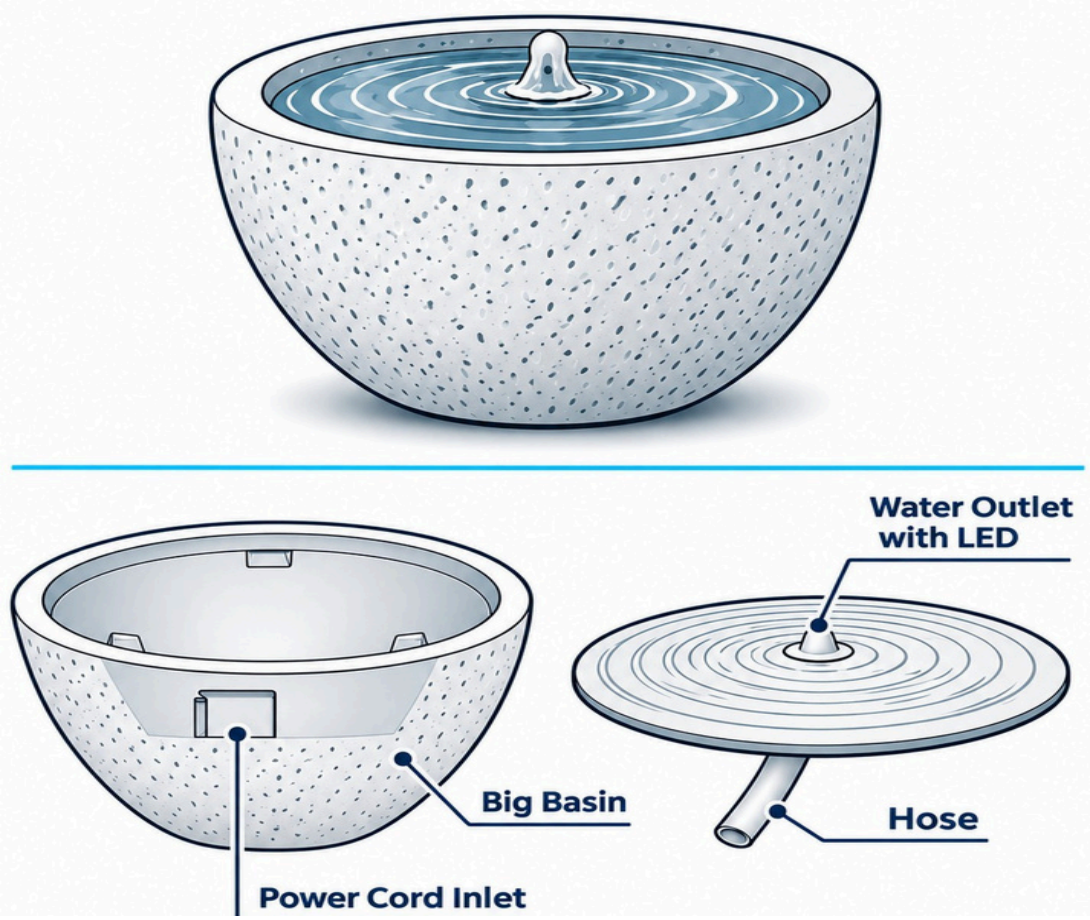
MODERN BOWL WATER FEATURE

ASSEMBLY INSTRUCTIONS



ASSEMBLY STEPS

1. Place the pump in the big basin. Thread the pump power cord through the pipe.
2. Insert the LED light into the hole in the lid and connect it to the hose.
3. Connect the pump to the hose and LED light cord, then place the lid on the big basin.
4. Connect the water pump to the power cord and fill the basin with water. Ensure the pump is submerged before switching on.

CARE & CAUTION

- Use a soft cloth to clean the fountain. Avoid acidic or alkaline cleaning agents that could damage the painted finish.
- Change the water regularly and remove leaves or debris to help prevent pump blockages.
- If water stops flowing, switch the pump off and check the pump and hose for blockages.
- **Always disconnect the power supply before cleaning, inspecting or handling the pump.**
