

# PONDOVAC CLASSIC

## POND & POOL VACUUMS

Item number: 50529

### *Top product characteristics*

- Maximum suction depth of 2 m
- Automatic activation and emptying through clever motor control
- Multifunction use for pond, pool, and household

### *Product characteristics*

---

- Suction capacity up to 3000 l/h, depending on the implementation conditions
- Automatic activation and emptying through clever motor control
- Silt removal through powerful 1,400 W motor
- Compact design with 27 l wastewater tank

- Transparent suction tube for flow through control
- Maximum suction depth of 2 m
- Included in the scope of delivery: 4 suction pipes, 4 different suction nozzles (see details), 1 filter bag, 1 coarse debris collection sack and 4 m suction hose and 2 m drain hose

## Technical data

---

<b>Dimensions (L x W x H)</b>	mm	370 x 370 x 580
<b>Rated voltage</b>		220 - 240 V / 50 Hz
<b>Power consumption</b>	W	1400
<b>Power cable length</b>	m	4.00
<b>Net weight</b>	kg	9.50
<b>Guarantee <span style="font-family: monospace;">&lt;span class="CBPRINT"&gt;&lt;span class="sternhochgestellt"&gt;*&lt;/span&gt;&lt;/span&gt;&lt;/span&gt;</span></b>	Years	2
<b>Suction depth max.</b>	m	2.00
<b>Max. flow rate</b>	l/h	3000
<b>Length, suction hose</b>	m	4.00
<b>Length, discharge hose</b>	m	2.00
<b>Floating hose application</b>		Not possible
<b>Item number</b>		50529
<b>EAN</b>		4010052505299

## Details

---

### Scope of delivery

With 4 suction pipes (3 x black, 1 x transparent), 4 suction nozzles, (variable universal nozzle, special string algae nozzle, flat nozzle with rubber lip and crevice nozzle), 4 m

### Switch

Illuminated rocker switch for starting the vacuum process.

suction hose and 2 m  
discharge hose, 1 filter  
bag for dry vacuuming and  
1 coarse debris collection  
sack.

**Plug connections**

For fast installation of the  
suction and discharge  
hoses.

**Quick release**

For easy opening of the  
motor unit.

---

*Included in the scope of delivery*

---

**Universal nozzle**

The all round product (2-  
10 mm) removes pond  
floor debris without  
vacuuming up the gravel.

**Special string algae  
nozzle**

With this nozzle, strands  
of string algae can be  
separated and easily  
removed.

**Flat nozzle**

The flat nozzle has rubber  
lips that permit trouble-free  
wet suctioning of residual  
water, or enables use in  
the household as a dry  
vacuum.

**Crevice nozzle**

Pollutants between stones  
and plants can be  
suctioned out with ease.

**Wastewater discharge**

Simply dispose of it as  
»organic fertiliser« in a  
flower bed or via the  
sewer.

**Debris collection bag**

Ideal for returning cleaned  
water when suctioning  
larger particles > 1 mm –  
not suitable for pond silt.
