HOUSE®**  
*Pumps & Garden*

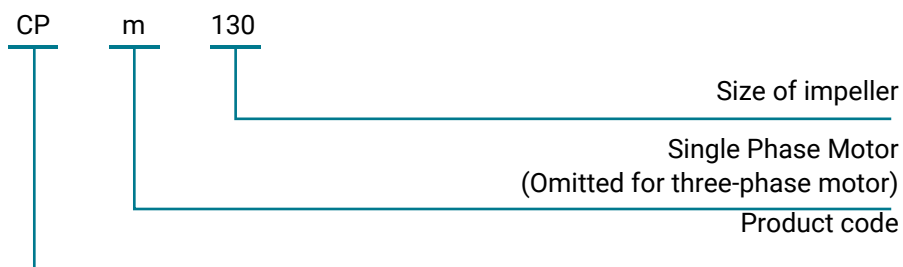

# SINGLE STAGE PUMPS

## CPM

This series of electric pumps is small in size, light in weight, compact in structure and easy to install. It is an ideal high-efficiency and energy-saving household electric pump. It is widely used in farmland irrigation, sprinkler irrigation, garden sprinkler irrigation, vegetable greenhouse water supply, and aquaculture water supply and drainage. And the occasions where domestic water is used for water extraction from wells, tap water pressurization, etc.

### MODEL INSTRUCTION

### PUMP CONFIGURATION

Pump Body:	Cast iron
Impeller:	Brass or stainless steel
Motor Shaft:	45# steel or stainless steel
Mechanical Seal:	Ceramic - graphite

### PUMP FEATURES

- ✓ Overload protection
- ✓ Small size, light weight
- ✓ Low noise operation
- ✓ Compact structure, easy to install

### PUMP USE PRECAUTIONS

- ✓ Before the first use, the water storage tank should be filled with water;
- ✓ The PH value of the medium is between 6.5-8.5;
- ✓ The ratio of solid impurities in water does not exceed 0.1%, and the particle size is not larger than 0.2mm;
- ✓ When the temperature is lower than 0°C, antifreeze work should be done.

The pump is mainly composed of three parts: motor, water pump and seal. A single-end mechanical seal is installed between the water pump and the motor. "O"-shaped oil-resistant rubber sealing ring is used for static sealing at the sealing part of the fixed stop.

### TECHNICAL SPECIFICATIONS

✓ Max.Power:	Up to 2.2kW
✓ Max.Flow:	133 l/min
✓ Max.Head:	55 m
✓ Suct.Max:	7 m
✓ Size:	1"×1"

### 6 ADVANTAGES

- ✓ Easy to install
- ✓ Energy efficient
- ✓ Overload protection
- ✓ Copper wire motor
- ✓ Low-noise operation
- ✓ High lift

# PERFORMANCE

## CPM

### PUMP CONFIGURATION

Adopting excellent hydraulic design and reasonable structural equipment, the electric pump has higher efficiency, more stable and quieter operation than similar products

#### HIGH QUALITY BEARING

Wearresistant,smooth running, no jamming

#### COPPER WIRE MOTOR

High-quality thickened copper wire; Cold-rolled 800 silicon steel sheet; Built-in thermal protector.

#### MACHANICAL SEAL

Ceramicto graphite material, better improve the sealing of the product

#### 304 STAINLESS STEEL WELDED SHAFT

Made of intelligent finishing casting, running smoothly, reducing wear and noise

POS.	COMPONENT	CONSTRUCTION CHARACTERISTICS
1	PUMP BODY	Cast iron
2	KEY	Stainless steel
3	COUPLING	Deep groove ball bearing
4	ROTOR	45# steel or stainless steel
5	END COVER	Stainless steel
6	IMPELLER	Brass or stainless steel
7	MECHANICAL SEAL	Ceramic - graphite
8	BEARING	Deep groove ball bearings
9	STATOR CORE	Stator core with winding
