

WATER HOUSE®

Pumps & Garden

EASY SET UP INSTRUCTIONS

ALL-IN-ONE PATIO WATER FEATURE

www.waterhouse.co.za

01

CHOOSING A LOCATION

- Place the water feature on a stable, level surface.
- Ensure it is near a power source if using an electric pump. If you have chosen the Solar option then consider where you will place the panel.
- Fill your basin with water about 80% full.

02

INSTALLING THE PUMP

- Remove the pump from its packaging & Submerge it into the water.
- Connect the preferred Nozzle to the pump outlet.
- Ensure the pump sits at the bottom of the water basin, use a stone to secure it.
- If using an electric model, plug the power adapter into your plug point.
 - If using the misting unit, plug the transformer into a power source.
 - Place the silver disc on the water's surface near the pump; ensure it is not fully submerged, or mist will not form.
- If using a solar-powered model, place the solar panel in direct sunlight by using the stake or wall mount included.
- Turn on the pump and allow water to circulate.

03

MAINTENANCE TIPS

- Water Level:** Regularly check and refill water to keep the pump submerged.
- Cleaning:** Clean the pump and basin every two weeks to prevent algae buildup.
- If outdoors, avoid placing under direct sunlight to reduce water evaporation.
- Do not cut the cable or extend it if you have chosen the solar option.
