

30 Metre Outdoor Misting Cooling Kit Installation & User Manual

Thank you for purchasing the Waterhouse 30 Metre Outdoor Misting Cooling Kit. This pre-assembled misting system is designed to provide cooling relief for patios, pergolas, outdoor entertainment areas, restaurants, greenhouses and other outdoor spaces.

Important: Pump not included. The kit can be connected to a garden hose or a suitable pressure pump.

What's Included

- 30 Metre pre-assembled misting line
- 30 Fine misting nozzles (0.2mm)
- ½" Female Thread to 6mm Push-In Connector
- Installation & User Manual

Before You Start

1. Inspect all fittings and nozzles before installation.
2. Select a suitable structure such as a pergola, awning, fence, umbrella or patio roof.
3. Ensure your water source is clean to prevent nozzle blockage.

Installation Instructions

Step 1: Position the misting line around the perimeter of the area you wish to cool.

Step 2: Secure the line to the structure using suitable clips or cable ties (not included). Position nozzles facing slightly downward.

Step 3: Connect the supplied fitting to your garden hose or pressure pump outlet.

Step 4: Turn on the water supply and check for leaks.

Step 5: Adjust positioning if required for optimal cooling coverage.

For Best Performance

- Use a pressure pump for the finest mist and best cooling effect.
- Install under pergolas, patios and covered entertainment areas.
- Use clean water to reduce maintenance requirements.
- Avoid directing mist onto electrical equipment.

Maintenance

- Inspect nozzles regularly for debris.
- Flush the system periodically with clean water.
- Remove and clean blocked nozzles if performance decreases.
- Drain the system when not in use for extended periods.
